Shortlisting Parameters	1)The fund follows a stock selection approach using the 5-factor framework factors like Management quality, Sector outlook, Company outlook, Earnings growth & resilience and Valuations. 2) The fund is strategically positioned with major allocations to high-growth sectors such as Infrastructure, Capital Goods & Power etc. 3)Since launch, the fund has delivered strong returns, with 3-year and 5-year annualised growth of more than ~21%, outperforming many peers in the category.	1)The Fund adopts a special situations strategy, targeting companies undergoing structural or regulatory shifts. It follows a bottom-up, multi-cap approach to capture asymmetric return opportunities. 2)The fund has delivered competitive long-term returns — with 3-year and 5-year annualised returns significantly above its benchmark. 3)The Fund is managed by R. Janakiraman, Kiran Sebastian, and Sandeep Manam, combining over a decade of experience in special-situations equity investing	1)The fund invests across traditional and renewable energy companies, benefiting from India's rising power demand, infrastructure expansion, and clean energy transition. It captures long-term opportunities across the entire energy value chain. 2)Energy cycles can deliver strong alpha during sector upturns, making it suitable for investors with higher risk appetite and a long-term horizon. The fund complements diversified portfolios with focused thematic exposure. 3)The fund is managed by Nitya Mishra, bringing strong research depth and disciplined risk management in energy-focused investing.	1) The fund follows a special situations strategy, investing in companies undergoing transformation or temporary challenges to capture long-term alpha from mispriced opportunities. 2) Since inception, the fund has delivered an annualized average return of around 19%. 3)It is managed by Mr. Sankaran Naren along with the team, the fund benefits from deep experience in equity research and stock selection. Their bottom-up approach focuses on identifying companies with real special-situation catalysts rather than purely index replication	1) The fund follows a dedicated manufacturing theme, across sectors such as automobiles, capital goods, industrial products, materials and engineering. The mandate aims to capture secular growth associated with domestic production, value chain expansion, import substitution and the broader "Make in India" story. 2)The portfolio includes companies across segments benefiting from manufacturing strength. 3) Fund has delivered a annualized average return of more than 24% over 3 years time horizon, which is relatively higher than the category average.	1) The fund Focuses on consumption demand: The fund invests primarily in companies that are likely to benefit directly or indirectly from consumption-led demand in India — including consumer staples, discretionary, services, automobiles, telecom and related sectors. 2) The fund uses a bottom-up investment approach to identify companies with high return ratios (ROE), strong competitive advantages and scalable business models that can benefit from increasing consumer demand. 3)The fund has delivered ~15%+ CAGR since inception, outperforming its benchmark.	1)The core premise of the fund is business cycle investing, identifying where the economy is changing & shifting sector/stock weights accordingly to capture cyclical trends. It reallocates capital across industries as economic conditions change, aiming to benefit from cyclical earnings momentum rather than static sector positions. 2) The fund manager, Mr. Atul Mehra has over a decade of experience in equity research and fund management.

Funds Rationale	1) The underlying assets of these funds are a mix of arbitrage funds and debt funds, primarily corporate bond funds. 2) These funds offer significant tax advantages, being taxed at 12.5% after a holding period of two years, unlike liquid or pure debt funds which are taxed as per the investor's income slab. 3) With around 60% of the portfolio invested in debt categories like corporate bond funds, the expected returns are 60-90 basis points higher than those of traditional liquid funds.

5 Yr -	24.27%	-	-	-
Since Inception	12.22%	34.36%	34.91%	36.51%
Funds Rationale	1) In today's uncertain global environment, diversifying across asset classes helps cushion portfolio downside, with gold serving as a natural hedge. Combined with Fed easing, central bank buying, geopolitical tensions, and seasonal Indian demand, gold remains an attractive asset. 2) Countries aim to reduce their dependency on the dollar. The dollar is still by far the most widely held reserve currency and remains essential for conducting international business. Gold's share of global international reserves has jumped to ~20%		1) Silver has been a crucial asset, both as a precious metal and for its industrial applications, 60% of the global silver demand is from various industries, including electric vehicles (EVs), solar panels, artificial intelligence, and batteries. 2) As EV production scales up, particularly in Europe, India and China, silver demand is expected to rise to nearly 90 million ounces annually by 2025.

SIF & LONG SHORT AIF

Fund Category	Specialized Investment Funds		Long Short AIF
Scheme Name	<u>Edelweiss Altiva Hybrid Long Short Fund</u>	<u>Tata Titanium Hybrid Long Short Fund</u>	<u>ASK Absolute Return Fund</u>
AUM(In Crs)	~3,790 Cr.	~ 536 Cr.	~779 Cr.
Inception Date	Oct-25	Dec-25	Jan-24
Investment Objective	The primary objective of the investment strategy is to generate capital appreciation through equity and equity-related instruments, while delivering stable income through arbitrage, derivatives strategies, special situations, and fixed-income investments. The target is to achieve arbitrage-plus returns. The portfolio is constructed with - Core Drivers = Arbitrage and Fixed Income - Enhanced Drivers = Special Situations and Derivative Strategies.	To generate medium- to long-term capital appreciation by investing in equity and equity-related instruments as well as debt and money market instruments. The strategy may take limited long and short exposure through derivatives to enhance returns, manage downside risk, and generate incremental alpha. By combining multiple uncorrelated return drivers, the strategy aims to deliver improved risk-adjusted returns, targeting approximately 2% outperformance over Balanced Advantage Funds across market cycles.	1) The fund follows a bottom-up approach for sector & stock view & aims to deliver absolute returns over medium to term with lower degree of volatility compared to broader Indian equity indices. 2) Aims to deliver consistent risk adjusted returns with an alpha of 100-150 bps (net of fees & tax) over liquid fixed income alternatives from a 12+ month investment horizon.
Target Return	9-10%	10-12%	12-14%
Minimum Investment	10 lakh	10 lakh	1 Cr
Fund Structure	Open Ended	Open Ended	Open Ended
Shortlisting Parameters	1) This fund is well-suited for investors seeking capital preservation while earning superior returns compared to traditional fixed-income or arbitrage products. With SIFs enjoying mutual-fund-like taxation, investments held beyond two years are taxed at only 12.5%, making this one of the most attractive low-risk, absolute-return options in the market, targeting 7-8% post tax. 2) The fund combines arbitrage, fixed income, special situations, and conservative derivative strategies—each inherently low-risk—to generate steady returns. These are executed with a cautious approach, helping maintain overall portfolio volatility in the range of ~2-2.5%. 3) The strategy is overseen by Bhavesh Jain, who brings nearly 17 years of experience in managing low-risk investment approaches.	1) This fund is suited for investors aiming for equity-like returns but with moderately lower risk. However, the strategy carries meaningful volatility due to its ~50% allocation to cash equities, which may not align with a pure capital-preservation objective. 2) The portfolio structure includes 50% allocation to cash equities, 25% to debt instruments, and the remaining 25% to derivative strategies designed to reduce risk and enhance alpha generation. 3) The fund is managed by Suraj Nanda, who previously led a long-short strategy at ICICI and delivered 2-3% alpha over the Nifty 50 while operating at roughly half the index's volatility.	1. Utilizes long and short positions, combined with fundamental, technical, and quantitative analyses to adjust dynamically across diverse market scenarios. 2. Incorporates macroeconomic views, geopolitical factors, and sector-specific opportunities for informed decision-making and superior performance. 3. Managed by a seasoned investment team with over 19 years of experience, supported by ASK Group's robust reputation in asset management. 4. Targets alpha of 100-150 Bps (net of fees & Tax) over liquid fixed income funds.

LARGE & MULTI CAP PMS

<u>Scheme Name</u>	<u>ICICI Pru PMS Largecap Strategy</u>	<u>Aditya Birla SL India Special Opportunities Portfolio</u>	<u>ICICI Pru PMS Value Strategy</u>	<u>Abakus All Cap Approach PMS</u>
Investment Objective	ICICI Prudential PMS Largecap Strategy (the "Strategy") is a diversified equity portfolio that endeavours to achieve long term capital appreciation by investing predominantly in large-cap companies. The Strategy seeks to achieve capital appreciation through investments in Indian companies or sectors with potential for growth. The Strategy aims to predominantly invest in companies that tend to grow earnings at a fast pace and are reasonably priced.	The objective of Aditya Birla SL India Special Opportunities Portfolio Multi-Cap PMS is to invest by analyzing the fundamental attributes of the company & competition & analyzing the macro economic factors & industry growth characteristics by 'Top-Down' approach. It takes 70%-100% exposure in Higher upside potential with catalyst expected to play out over a period of 2-3 years & 0-30% in Consistent performers.	The Strategy aims to follow a value investment style and intends to offer a diversified portfolio of stocks that have high potential but are quoting at a discount to their fair/intrinsic value. The core investment philosophy of investing is based on : 1. Stocks cannot continue to quote at values that are below their fair values over the long term; 2. At some point in time, the markets are likely to recognize the extent of under-valuation of these companies. The same could lead to a rerating/appreciation in the company's stock price.	The PMS is a multi-cap PMS designed to generate alpha and risk-adjusted returns for clients by investing in benchmark agnostic portfolio across market capitalization. The idea is to focus on growth in value. A well diversified, aspiring leaders portfolio that makes selective sector calls with a contrarian approach and usually are first investors.

MULTI CAP PMS

Scheme Name	<u>Buoyant Opportunities Strategy</u>	<u>Emkay Golden Decade Fund</u>	<u>Negen Capital - Special Situations and Dynamic Allocation Fund</u>	<u>Motilal Oswal Founders Portfolio</u>
Investment Objective	The objective of Buoyant Capital Opportunities Multi-Cap PMS is to invest taking concentrated bets for the long term, following altering balance in the aggressiveness-to-defensiveness continuum, which is attained through diversification of cash flow streams, choice between predictable vs. growing cash flow streams and cash calls (pooled vs. model portfolio). Sector rotation strategy.	The objective of the India's Golden Decade strategy is long-term capital appreciation by investing in companies poised to benefit from India's multi-decade structural growth themes, including rising consumption (from subsistence to indulgence), digitisation/AI, energy transition, financialisation of savings, and manufacturing prowess, executed via a flexicap approach across market-caps with a concentrated portfolio of 25-35 high-conviction stocks	Fund is predominantly a smallcap and midcap focused PMS with a keen interest in identifying value investing opportunities via special situations like demergers and Spin offs. The objective is to create consistent profits for clients in all market conditions, through values of professionalism, transparency, and safety. The belief is to aim at Sustainable Value Creation Via Growth Investing & Special Situation Investing.	Capital Preservation: Focus on quality business run by great management, bought at reasonable price, & applying an appropriate risk management framework (High ROE/ROCE & PEG Framework). Capital Appreciation: Participating in themes & sectors favoured by strong economic tailwinds & a high probability of success in the medium term. Investment Process "Q-G-L-P" Quality: Min. threshold set for RoCE/ROE Growth & Longevity: Investing in suitable themes identified by the investment team collectively. Price: Application of PE, PEG framework & Expanding the framework through rolling out DCF, implied returns & growth.

<u>Scheme Name</u>	<u>Abakus Emerging Opportunities Approach</u>	<u>Carnelian Shift Strategy</u>	<u>ICICI Pru PMS PIPE Strategy</u>	<u>Burman PMS</u>
Investment Objective	A Mid & Small Cap focused PMS designed to generate alpha and risk-adjusted returns for clients by investing in benchmark agnostic portfolio across Mid & Small Cap companies. Portfolio follows a 15:15:15 discipline- >15% ROE, >15% earnings growth, <15 P/E Ratio. Typical exposure limits Single stock: 10% at market value, Single promoter group: 25%	The strategy aims to capture growth from structural shifts in Manufacturing and Technology through a long-only, multi-cap approach. It focuses on quality mid and small-cap companies with niche capabilities, strong balance sheets, and governance standards. Combining high-growth opportunities ("Magic" 62.8%) with stable performers ("Compounders" 32.7%), the portfolio follows a disciplined, bottom-up, fundamentally driven investment style for sustainable wealth creation.	It aims to provide long-term capital appreciation and generate returns by investing predominantly in Mid and Small-cap segments of the market by having exposure to companies enjoying some economic moat or amid unfavorable business cycles.	Burman Capital Management is a Mid-small spectrum PMS. It follows a highly selective and concentrated approach. Portfolio has a bottom-up approach and choose businesses on their future return potential and not basis weightage in headline indices.

Shortlisting Parameters	1) Invests in promoter driven companies that delivers higher growth, min holding 26%. 2) Companies with min Additional expected earning 3-5Y Growth of 3% over benchmark, Available at Relatively Attractive Valuation. 3) Has a long term track record of running PMS strategies.	1) The Fund blends listed equities across market-caps with up to 35% exposure to unlisted/pre-IPO opportunities; distinctive proprietary E-Qual Framework (quantitative scoring of management integrity 40%, capability 30%, wealth distribution 15%, investor communication 7.5%, liquidity 7.5%) ensures zero exposure to low-governance managements, red flags like high promoter pledging >70%, repeated debt restructuring or excessive related-party transactions, and filters via risk-reward matrix for quality-adjusted small/mid-cap premiums. 2) The listed portfolio mirrors the Golden Decade strategy, comprising 25-35 stocks diversified across large, mid, & small caps. Investments are guided by five structural growth themes, following a low-churn, buy-&hold approach aimed at generating long-term wealth.	1) The fund targets long-term capital appreciation from India's multi-decade growth drivers such as manufacturing, financialisation, digitalisation, green energy, defence, data centres, healthcare and semiconductors, where small- and mid-caps can offer outsized earnings growth and re-rating potential. 2) The sector-agnostic charter with the ability to invest 0-100% in listed equity and up to 35% of investable funds in unlisted/pre-IPO opportunities allows participation both in publicly listed compounders and in late-stage private businesses approaching listing or secondary liquidity. 3) The fund follows a "growth at reasonable price" philosophy, using a bottom-up process to identify scalable businesses with strong unit economics, high ROCE potential and ethical, competent management teams, rather than relying on top-down macro calls.	1) The fund follows a differentiated contrarian investment strategy focused on identifying fundamentally strong but temporarily out-of-favour sectors and companies. It aims to benefit from mean reversion opportunities by investing in undervalued businesses with a margin of safety and long-term growth potential. 2) The investment approach combines top-down sector allocation with bottom-up stock selection, focusing on management quality, business cycles, & valuation discipline. 3) The portfolio has a strong bias towards small and mid-cap companies across selected high-conviction sectors such as financials, manufacturing, infrastructure, logistics, and consumption. It maintains a focused portfolio of 25-30 stocks with exposure to only 4-7 value pockets at a time, enabling better participation in recovery cycles while avoiding overcrowded & expensive market segments.	1) One of the leading asset management company in India managing 23,463 Cr(as on May) in Long only strategy. 2) Fund replicates ICICI Contra PMS strategy, yielding 50%+ return in the past year. Benchmark-agnostic approach with no style constraints drives the funds performance.

DEBT PMS

Scheme Name	<u>Neo Yield Enhancer</u>	<u>Phillip Conservative Credit Portfolio</u>	
AUM(In Crs)	~ 1500 Cr.	~ 102 Cr.	
Inception Date	Jan-24	Growth Strategy- Aug 28th, 2023, Regular Income Strategy- Oct 10th, 2023	
Investment Objective	The fund focuses on fixed income, targeting estimated gross returns of 11-12% p.a. through investments in high-quality NBFC bonds rated AAA to A- (80-100%). It emphasizes on strong credit selection, ongoing monitoring, and a mix of core and opportunistic trades to generate additional alpha over traditional fixed income products. Investors benefit from high liquidity, low duration (1-2 years), and quarterly cash flows of 2%. Managed by an experienced team, the fund aims to balance risk and return by focusing on credit quality, governance, and market opportunities in the alternative lending sector.	The strategy targets consistent medium- to long-term returns over government securities with a strong emphasis on capital preservation. It employs a blend of accrual, duration, and selective credit strategies, primarily investing in high-quality, predominantly AA-rated issuers across NBFCs, HFCs, corporates, and state-owned entities. Returns are supported by attractive spreads of ~350-400 bps over G-Secs and potential credit upgrades, backed by a robust risk management framework to ensure low volatility.	
Gross IRR	10.50%-11.50%	~10.00% - 10.50%	
Minimum Investment	1 Cr.	50 Lakhs	
Fund Structure	Open Ended	Open Ended	
Shortlisting Parameters	1) The fund evaluates companies based on their capital resilience and debt composition, setting aside reliance on external ratings with a belief of having a sufficient equity buffer. 2) The fund's investment framework involves two parts:- Core Portfolio yielding 11% & Alpha Creation yielding an additional 1%, making gross IRR of 12%. Core Portfolio focuses on Alternative NBFCs, Operating Company, Opportunistic Trades, Liquid MFs, AAA investments, whereas Alpha creation focuses on Strategic Trades, Wholesale-Retail Arbitrage & Trading. 3) Neo targets NBFCs with low leverage (D/E ratios of 1.4-3.1x) and strong equity cushions (e.g., KrazyBee with 60% capital adequacy).	1) Credit Quality & Security: Minimum 50% allocation to secured instruments and AAA to AA- rated issuers, with unsecured exposure capped at 50% and A+ & above exposure limited to 50%, ensuring strong credit quality and capital protection. 2) Diversification & Risk Limits: Single issuer exposure capped at 30% and limited to 2% of a company's total outstanding debt, maintaining prudent concentration and risk control.

Minimum Investment	1Cr	1Cr	1 Cr.
Fund Tenure	4 years 11 months from first close	6.5 years from first close	7 years from first close
Shortlisting Parameters	1) The fund invests exclusively in “performing credit”—loans to established, profitable companies with no history of defaults or financial stress. There is no exposure to stressed assets, startups, or unsecured lending. 2) The fund aims for a gross IRR of 16%+ and a net IRR (after all expenses) of 13-14%. Investors receive quarterly coupon payouts of 9-10% annually, with the remainder paid as a redemption premium at maturity. 3) The portfolio is constructed across 25-30 companies, with exposure to any single company capped at 2-4%. Sectors include mid-sized NBFCs, real estate (mid-income housing), rural finance, MSME lending, and vehicle finance. This approach reduces concentration risk and aims for uncorrelated returns.	1) The fund represents a compelling opportunity to participate in fully secured, high-yield, cashflow-backed investments, targeting an annual return of 21%-23%. 2) The fund will invest in largely EBITDA-positive companies and provide flexible and patient credit capital to companies and promoters to help solve a special situation and create a win-win for them. 3) In series I, the fund has raised approximately INR 2,272 Cr from investors, reviewed 450 deals, invested in 19 companies across 12 sectors, and achieved a gross IRR of 23% p.a., exceeding its target return.	1) A different kind of product segmentation in terms of warehousing and a unique proposition in an Asset Buyout (60-70%). 2) The fund offers an effective means of generating stable cash flow and resilient long-term capital growth with minimal risk. 3) Top focused sectors are InvITs and ancillary sub sectors, Roads and Solar. 4) There are diversified 10-12 estimated numbers of Investments.

Investment returns are subject to fluctuation and may vary over time. Investors should be aware that past performance is not indicative of future results. Prospective investors are hereby advised that investments in unlisted securities are subject to certain inherent risks. These risks may include, but are not limited to, market volatility, reduced liquidity, and the possibility of capital or principal loss. All investors are strongly encouraged to evaluate their individual risk tolerance and investment objectives thoroughly. Unlisted securities are not traded on recognized stock exchanges, which may adversely affect the ease of exit or liquidation of such investments. It is advisable to seek independent professional financial advice prior to making any investment decisions. Centricity Fincap Private Limited, including its affiliates, directors, and employees, expressly disclaims any liability for losses, defaults, or unforeseen events that may arise in connection with investments in unlisted securities.

GIFT CITY FUNDS

Funds Category	Outbound Funds			Inbound Funds	
Scheme Name	Mirae Asset Global Allocation Fund	ABSL Global Bluechip Equity Fund	DSP Global Equity Fund	Alchemy India Long Term Fund	Motilal Oswal Alternative Investment Trust
Target Corpus	-	USD 200 million (Greenshoe – 200 Million)	-	-	-
Minimum Investment	USD 151,000	USD 150,000	USD 5,000	USD 150,000	USD 150,000
Fund Tenure	3 yrs (+2)	4 yrs (+1) from first close	-	-	-
Shortlisting Parameters	1) The fund follows a core-satellite style, allocating 50-70% to broad-based developed market ETFs and 30-50% tactically to emerging markets and high-conviction themes like AI, semiconductors and disruptive materials. 2) The explicit themes include AI (data centers, semiconductors, disruptive materials), defence tech, and blockchain, supporting the structural growth emphasis while allowing flexibility for industrials/financials via broad ETFs.	1) The fund domiciled in GIFT City that provides resident Indians and NRIs access to global blue-chip equities via the Lyptus Capital Master Fund LP, while investing in 20-30 high-quality companies that show "Triple B" qualities: Barriers to entry, Best-in-class operations, and strong Brands, targetin monopolies/duopolies with durable growth. 2) The strategy focuses on investing in high-quality growth companies at reasonable valuations, while maintaining over 70% active share to build a differentiated, high-conviction portfolio for sustainable long-term returns. 3) The fund enables participation in AI, semiconductors, cloud/AI infrastructure, and high-performance computing via dominant players unavailable through Indian mutual funds or direct LRS stock picks.	1) The portfolio is constructed using a bottom-up fundamental research framework, focusing on 30-50 high-conviction global leaders with strong balance sheets, scalable business models, and durable competitive advantages. 2) The strategy is sector-agnostic, geography-agnostic and benchmark-independent, enabling active alpha generation and superior risk-adjusted return. 3) The decisions are driven by company fundamentals and valuation discipline rather than macro forecasts or benchmark hugging, aimed at achieving absolute returns over time. 4) The fund's minimum ticket is around \$5,000, relatively accessible route to global markets for retail investors.	1) The fund targets India's structural growth by investing market-cap agnostically in listed equities, PIPEs, and IPOs of companies poised to exploit domestic/global opportunities, aiming for absolute long-term returns via GARP (growth at reasonable price). 2) Alchemy's philosophy centers on GARP in a high-growth India economy, identifying firms with sustainable competitive edges via bottom-up research, avoiding short-term trading for multi-year compounding.	1) The fund pitches its high-conviction, multi-cap strategy capturing India's growth themes like Make in India, premiumization, and renewables for superior risk-adjusted returns. 2) The fund adopts "QGLP" (Quality, Growth, Longevity, Price) framework in a competitive value style, targeting high-growth themes like manufacturing capex, premiumization, renewables, and urbanization.

Equity Mutual Funds

CY Performance

We have taken into account the alpha of 3-year and 5-year average calendar year returns.

Rolling Returns

We have taken into account the alpha of 3-year and 5-year average Rolling returns.

Sharpe Ratio

We prefer funds with a higher sharpe ratio in relative to its peers as it reflects better risk-adjusted performance.

Beta

We have given higher weightage to the funds having lower Beta. A beta of more than 1 indicates higher momentum than the benchmark and a beta of less than 1 with less momentum.

Turnover Ratio

We usually prefer funds having lesser turnover ratio.

Fund Level AUM

We prefer funds that manage a favourable Assets Under Management (AUM) in the category, as higher AUM can limit liquidity and funds return.

AMC Level AUM

We prefer AMC that manages a considerate amount of Assets Under Management (AUM).

Fund Tenure (yrs)

We prefer funds with a minimum past record of 3 years.

Fund Manager Tenure

We prefer Fund Managers with long tenures of experience and their historical past experience in terms of performance.

Debt Mutual Funds

Fund Level AUM

We prefer funds that manage a favourable Assets Under Management (AUM) in the category, higher AUM leading to better liquidity.

AMC Level AUM

We prefer AMC that manages a considerate amount of Assets Under Management (AUM).

Credit Ratings

Higher weightage towards higher credit quality. Lower credit quality indicates higher degree of risk.

Modified Duration

We prefer funds with lower Modified Duration. Lower MOD reduces the adverse impact of the Interest Rate change on the Debt Fund.

Average Maturity

Portfolio with a lower average maturity is preferred.

Net YTM (%)

Net YTM provides better understanding of the potential returns, after considering all the expenses.

Commodities

AUM

Higher AUM indicates better liquidity, lower tracking error, and greater investor confidence.

Tracking Error

Tracking error shows how closely an ETF, lower tracking error means the fund mirrors the gold or silver price more accurately.

Equity PMS/Listed AIF

CY Performance

We have taken into account the alpha of 3-year and 5-year average calendar year returns.

Rolling Returns

We have taken into account the alpha of 3-year and 5-year average Rolling returns.

Standard Deviation

Standard Deviation is used to measure the volatility or risk associated with a portfolio. Lower standard deviation implies more stable returns, making it a useful parameter for shortlisting portfolios.

Sharpe Ratio

We prefer funds with a higher sharpe ratio in relative to its peers as it reflects better risk-adjusted performance.

Beta

We have given higher weightage to the funds having lower Beta. A beta of more than 1 indicates higher momentum than the benchmark and a beta of less than 1 with less momentum.

Fund Level AUM

It represents the overall market value that the fund holds.

Fund Manager

We choose a funds based on the pedigree, fund managers' experience.

AMC

We prefer AMC backed or boutique PMS/AIF which have exceptionally well performance.

Long Short AIF

AUM

We prefer funds that manage a favourable Assets Under Management (AUM) size.

Fund Manager

We consider Fund Managers with extensive experience and a consistent track record of performance.

Exit Load

We give preference to funds with a lower exit load to reduce redemption costs and enhance liquidity.

Trailing Returns

We assess trailing returns to evaluate consistent performance over time.

CY Performance

We consider the alpha of average calendar year returns to measure performance consistency.

Target Returns

We prefer funds with clear and achievable target returns that align with investment goals.

Sharpe Ratio

We prefer funds with a higher Sharpe Ratio compared to peers, reflecting better risk-adjusted performance.

Volatility

We give higher weightage to funds with lower volatility, indicating more stable and predictable returns.

Maximum Drawdown

We prefer funds with a lower maximum drawdown to ensure resilience during market downturns.

Net/Gross Exposure

We evaluate the net and gross equity exposure to understand the fund's leverage and positioning.

Debt Rating

We prefer funds with higher-rated debt instruments for better credit quality and lower risk.

Debt YTM

We consider the yield-to-maturity of debt holdings to gauge potential returns from fixed-income assets.

Debt MOD

We assess modified duration to understand the fund's sensitivity to interest rate changes and manage duration risk effectively.

Definitions

Alpha

The excess return of an investment relative to the return of a benchmark index. Higher the alpha, better it is.

Beta

It is a measure of the volatility—or systematic risk—of a security compared to the market. A beta of more than 1 indicates higher momentum than the benchmark and a beta of less than 1 with less momentum.

Sharpe Ratio

A measure of risk-adjusted performance, it indicates the excess returns generated per unit of total risk.

Treynor Ratio

Treynor Ratio is a performance metric for determining how much excess return was generated for each unit of systematic risk taken on by a portfolio.

Sortino Ratio

Sortino ratio is a risk-adjustment metric used to determine the additional return for each unit of downside risk. A high Sortino ratio is preferred.

Standard Deviation

It is a measure to show the degree of variation from mean return. The higher the standard deviation, the greater the volatility of the fund.

Turnover Ratio

Indicates the frequency at which a fund's holdings are bought and sold. In other words, the percentage of a fund's portfolio that is churned in the last one year.

Downside Ratio

Measures the manager's performance in down-markets relative to the index. A value of less than 100 indicates that an investment has lost less than its benchmark when the benchmark has been in the red.

Upside Ratio

Measures a manager's performance in up-markets relative to the index. A value over 100 indicates that an investment has outperformed the benchmark during periods of positive returns for the benchmark

Credit Ratings

We prefer funds that hold bonds with the highest credit ratings because higher ratings correspond to lower chances of defaults

Secured/Unsecured

Unsecured bond is a bond where the issuer doesn't provide any collateral against the issued bond. While in the case of a secured bond, the issuer provides the loan and the right to the receivable against the issued bonds.

Listed/Unlisted

Bonds which are listed are trade on an exchange like the National Stock Exchange (NSE) or Bombay Stock Exchange (BSE) and vice versa.

Modified Duration

Modified Duration expresses the measurable change in the value of a debt security in response to a change in the interest rates.

Macaulay Duration

Macaulay duration is the weighted average term to maturity of the cash flows from the bond.

Average Maturity

Average Maturity is the weighted average of all the current maturities of the debt securities held in the fund.

YTM

YTM is the total return that you can expect from your investment in bond/debt mutual funds if the same is held till maturity. It may change as the fund manager buys and sells the bonds in the portfolio.

Face Value

The nominal value stated by any issue.

EPS

Earnings per share or EPS indicates the profitability of a company. It is calculated by dividing the company's net income with its total number of outstanding shares.

Stock P/E

Price to Earnings Ratio is the ratio of share price of a stock to its earnings per share (EPS).

Stock P/B

The price to book ratio measures the market's valuation of a company relative to its book value.

Net Profit

The amount of money a business earns after deducting all operating, interest, and tax expenses over a given period of time.

Fixed Fee Structure

In the fixed fee (only) structure, you will pay a fixed percentage, of your average portfolio value to the portfolio manager, periodically

Variable/Hybrid Fee Structure

Here, investors will pay a fixed fee and, in addition to this, will also pay a performance-based fee whenever your portfolio generates profits (beyond the hurdle rate)

Performance Fee

Performance fees are charged yearly, if the portfolio outperforms the hurdle rate

Hurdle Rate

The hurdle rate is the minimum rate of return that your portfolio must achieve before you start paying performance fees.

High Water Mark

High Water Mark refers to the highest value that a fund has reached since its inception and is used as a threshold to measure the performance of a fund manager.

Catch Up

Performance fee is applicable on all returns and not just on returns above the hurdle, if returns cross the hurdle rate.

No catch Up

No catch-up means that profit share will be applicable only on the incremental return over and above the hurdle rate.
